

# Log Splitter

Manufactured by Attachments International

Operates  
right side up  
or  
upside down

The AI severe service log splitter delivers **35 tons** of cutting force!

With 25 years of experience manufacturing the strongest attachments in the industry, we know log splitters. This unit features:

- Quad head wedge to give double the productivity versus the conventional splitter
- Special chromium high strength main beam
- Wedge placement at the end of the beam

With a stop block plate at the end of the beam, you multiply the forces required to split a log by 50%.

The engineering is simple:

- 50% less force required to split wood
- Longer beam life (in 25 years, we have NEVER had a beam failure)
- AI multi hitch allows splitting upright or in the down position (shown). Fits all Bobcat compatible quick hitches OR quick attaches to category I and category II 3 point hitches
